Ethical Approval Certificate for Research Study

This is to certify that the Ethics Review Committee of Daffodil International University has reviewed the application and supporting documents submitted for ethical clearance for the research titled "Onidra: A Clinically Annotated Survey Dataset for Insomnia and Anxiety Assessment Among Young Adults Based on ISI and HAM-A", conducted by Afsana Begum (Employee ID: 710001535).

The Committee is pleased to inform that the proposed research has been approved. The study has been found to meet the ethical standards required for conducting research involving human participants.

This approval is granted based on the following conditions:

1. Voluntary participation and informed consent must be ensured.
2. Confidentiality and anonymity of all participants must be strictly maintained.
3. No personally identifiable information should be collected.
4. The data must be used solely for academic purposes.
5. Participants must retain the right to withdraw at any point without consequences.

This approval is valid for a period of **36 months** from the date of this letter. Any significant changes to the study design or procedures must be submitted to the committee for review and further approval.

We wish you success in your research and appreciate your commitment to ethical research practices.

Sincerely,

Khalid Been Md. Badruzzaman Biplob
