Survey on Insomnia and Anxiety Disorder

Conducted by:

**Department of Software Engineering, Daffodil International University
and
Achol Foundation**

Dear Participant,

The Department of Software Engineering of Daffodil International University and Achol Foundation regularly arrange mental health-related workshops and seminars to raise awareness about psychological well-being and healthy lifestyle practices. As part of these sessions, participants are often provided with an opportunity to meet and discuss their concerns with a psychologist or mental health professional.

During or after participating in these sessions, you may realize that you are experiencing sleep-related or anxiety-related difficulties. If you feel that you may be facing such issues, you are requested to complete this questionnaire before meeting with the psychologist. The purpose of this survey is to better understand sleep and anxiety conditions and to support research and awareness activities related to mental health.

Your participation in this survey is completely voluntary. You may choose not to participate or may withdraw at any time without any penalty or disadvantage.

The survey will take approximately 10–15 minutes to complete. The questionnaire includes questions related to sociodemographic information, sleep patterns, anxiety symptoms, lifestyle habits, and health conditions.

Some participants in this study may be under 18 years of age. For participants below 18 years, participation in this survey indicates that parental/guardian permission has been obtained or approved according to the session arrangement and institutional guidelines.

All information collected through this survey will be kept strictly confidential and used only for academic and research purposes. No personally identifiable information will be disclosed or published. Data will be analyzed and reported only in aggregated form.

Some questions related to sleep, stress, or emotional well-being may cause mild emotional discomfort. As this questionnaire is part of the assessment process before consultation with the psychologist, participants are requested to answer all questions as accurately and honestly as possible.

By signing below or proceeding with the survey, you confirm that:

- You have read and understood the information above.
- You voluntarily agree to participate in this study.
- You understand that your responses will remain confidential.
- You are aware that you may withdraw at any time without any consequences.
- If you are under 18 years of age, necessary permission from a parent or guardian has been obtained.
